# Database Administrator | W4 Games

## Description

W4 Games is currently hiring a database administrator experienced with PostgreSQL in high-availability scenarios.

## Responsibilities

- Configure, deploy, and maintain multiple PostgreSQL instances.
- Provide technical advice on security and optimizations of existing databases.
- Design optimized databases for new applications.

## Qualifications

Required:

- Good knowledge of PostgreSQL administration.
- Proficiency in PL/pgSQL.
- Ability to work in a team environment and maintain a respectful and professional attitude at all times.
- Professional proficiency in English.

Recommended:

- Competence in at least one infrastructure as code solution (e.g. Terraform, Ansible, Pulumi).
- Basic understanding of the Kubernetes ecosystem.

Bonus points:

- Proficiency in Python.

## Hiring and Location

W4 Games is an online-only studio and all team members work remotely. The form of your work arrangement with W4 Games will depend on your country of residence and the country's legal requirements.

## About

[W4 Games](#) is a company founded by the leadership of the [Godot Engine](#) project. It aims to help the gaming industry reclaim control of the technology it uses to create games. Its mission is to enable companies to have the same freedom to innovate as if they created their own in-house engine, but without needing an in-house technology team behind.

W4 Games offers a set of products and services for companies to make the best possible use of Godot Engine, so they can develop games and bring them to market with peace of mind.

## Equal Opportunity

W4 Games is an equal opportunity employer committed to providing an open, collaborative and friendly work environment and does not discriminate based on, gender identity and expression, sexual orientation, physical appearance, body size, race, ethnicity, language proficiency, age, political orientation, nationality, religion or other similar characteristics.
